Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US Patent 54-107752 (752).

Per claim 1, 752 teaches a liquid crystal display device comprising a pair of substrates [1], a liquid crystal inserted in an annular seal between said pair of substrates [figure 4b, reference no. 7], and a threshold pattern provided in a frame portion between said annular seal and a pixel display area [seal 6 in figure 4b], said threshold pattern having an opening connecting said pixel display area with an area provided with liquid crystal [inherent] and located between said annular seal and said threshold pattern. For evidence that the liquid crystal leaks into the region between the seals see US 5037185 A

Per claim 2, 752 teaches a liquid crystal display device according to claim 1, wherein said threshold pattern extends substantially in parallel with at least one side of said annular seal [see figure 4].

Per claim 3, 752 teaches a liquid crystal display device according to claim 1, wherein said threshold pattern annularly extends substantially in parallel with said annular seal with a gap from said annular seal [see figure 4].

Per claim 4, 752 teaches a liquid crystal display device according to claim 1, wherein said threshold pattern extends substantially in parallel with at least one side of said annular seal with a gap from at least one side of said annular seal, and a closed space is formed between said threshold pattern and at least the one side of said annular seal except for said opening [see figure 4].

Per claim 6, 752 teaches a liquid crystal display device according to claim 1, wherein the liquid crystal is dripped on one substrate, and the annular seal has no injection hole [seal 7 lack an injection hole and spec teaches dropping].

Response to Arguments

Applicant's arguments filed 2/15/06 are moot because of the new ground of rejection.

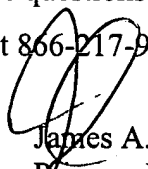

Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
